Who we are !

Integrated Technical Solution (ITS) Company is an independent organization with limited liabilities registered and working in accordance with rules and regulations of the Kingdom of Saudi Arabia specified by Ministry of Commerce and Industries, driven by enthusiastic safety and security experts.

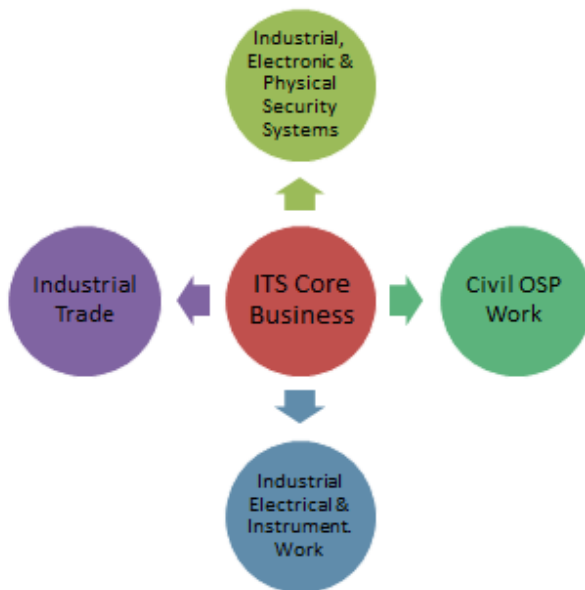

While possessing – years of practical experience and services oriented attitude, professional approach, we have been emerged as valued security solution provider in the related industry. We distinguish ourselves by developing practical and economical security solutions that truly make a difference without compromising risk and quality of craftsmanship. Our Turnkey Solutions are embedded with innovative industry leading products and methodologies that offers customer complete peace of mind.

We carefully make use of innovative products and methodologies while designing solution. Our several years of professional experience in integration and construction has built reputation in reliability and trustworthy solutions architecture providers, quality conscious and safety acquainted knowledge based Saudi company. It is worth to state that, in short span of time ITS has secured strong foothold in the related market segment.

The continuous success in the business and reputation has encouraged the management and entire team to accept any kind and size of challenging project that falls with the company expertise and knowledge base.

Our Core Business Activities:

ITS endeavors and wishes to be among the most respected Turnkey Integrated solutions provide while observing best practices and effective processes within the specialized market segment defined and specified in our company portfolio.

Our Mission!

We endeavor for customer satisfaction without compromising on Quality and **Safety & Security** while delivering on-time cost effective solutions based upon cutting edge technologies.

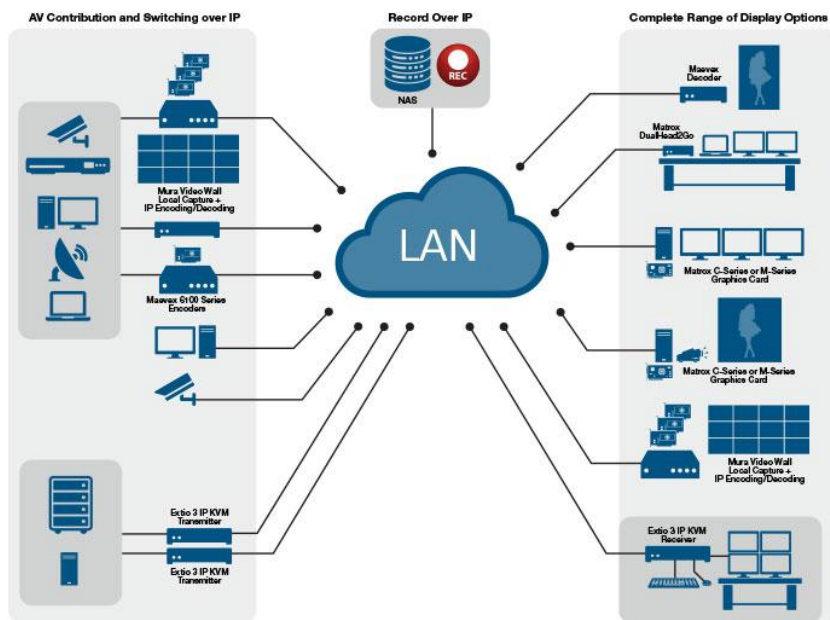

We strive to unburden our valuable clients from all kind of apprehensions related to projects by absorbing **responsibilities** at our end while identifying risks and translate these into effective, practical solutions. Our proposed solutions enable our clients to manage their physical risks while providing measureable control.

ITS Solutions!

In the current complex situation of organization’s Intra and Web connectivity, the Internet Protocol (IP) has established as the principal communications protocol which transmit the data packets from one system to another and allows the devices to communicate.

ITS onboard experts utilize full capabilities while understanding the given site situation plan, design and implement wider range of integrated solutions. Few of these integrated solutions as identified as follows sectors:

- ✦ Cyber Security
- ✦ Security Management System (SMS)
- ✦ IP based Video Assessment & Surveillance System (VASS)
- ✦ IP based intrusion Detection System
- ✦ Long Range Detection system (Radar, Thermal Camera)
- ✦ IP Intercom
- ✦ VoIP (Video Over IP)
- ✦ IP Convergence
- ✦ Access Control System (Local and cloud based)
- ✦ Large Format Video Displays (LFVD)
- ✦ Perimeter Fence Class-1, 2, 3, 4, (Welded Mesh fence, Chain link fence, Anti vehicle barriers)
- ✦ Physical security (Road Blocker, Raising Arm Barrier, Motorized/Manual Sliding Gates, Crash Rated Raising arm barriers)
- ✦ Scanning devices (X-Ray, Explosive trace Detector, Walk Through Metal Detectors, Hand held Metal detectors).

ITS Trading

ITS has extensive designing capabilities in the Trading sector:

ITS mission is to serve a worldwide customer base providing innovative international trading and logistics solutions that recognizes the value of customer care.

- ❖ To generate a high standard of commitment to our customers
 - ❖ To treat our clients, suppliers and employees with honesty and respect
 - ❖ To grow in both business and personal life
 - ❖ To provide a quality working environment with advanced technology that enhance all employees quality of life
 - ❖ To offer an unsurpassed level of service at the most competitive rates
- Flow Sensors, Temperature recorders, Temperature sensors,
 - Mechanical Seals, Weighting scale, hot plate.
 - CCTV Camera, Thermal Cameras, RADAR, Volumetric Detectors, Fiber Fence Sensor, Video walls, consoles.
 - Rebars, chemical used in civil construction

ITS Supplementary Expertise!

ITS has extensive designing capabilities in the following ELV systems:

- ❖ Wired and Wireless communication system TETRA
- ❖ Audiovisual Systems:
- ❖ Sound Reinforcement, Audiovisual and Multimedia
- ❖ Visual display systems, large format video walls/LED walls, scoreboards Broadcast Systems and Infrastructure
- ❖ SMATV and Satellite Farms
- ❖ Structured Cabling System (SCS)
- ❖ Outside Plant (OSP), Data Center Design, IP Telephony / Data Networking,
- ❖ IPTV,

Digital Signage and Digital Way Finding System.

On-Going Projects!

Client Name:	REEM RABIGH ENERGY COMPANY
Main Contractor:	SEPCO
Project Name:	RABIGH 2 SOLAR PV INDEPENDENT POWER PLANT
Project Duration:	MAY 2026 – SEP 2027
Project Value:	18 M SR
Project Status:	Ongoing.
Scope of Work:	Turkey Solution to Implement an Integrated ISS System at Rabigh 2 Solar PV Independent Power Plant Project • Approval from the authorities. • Design Supply installation and construction of - CAT-3 fence. - Lighting design and calculations for perimeter, Gatehouse, buildings etc. - Main Gate House and support building. - Motorized Sliding gates. - Physical security like Road Blocker, Raising Arm Barrier, speed humps. - VASS system for perimeter with Thermal Cameras and PTZ cameras. - Video and Data Transmission system - Access control system for vital buildings and entry guard house. - Security Control Center Design and Inegration • Operator training, power up and testing commissioning and warranty. • Maintenance of the installed system as well other security equipment. • Related civil work like foundations, trenching, road crossings etc.

Client Name:	SWESC
Main Contractor:	SEPCOIII
Project Name:	RAS TANURA IWWTP
Project Duration:	MAY 2025 – SEP 2026
Project Value:	5.5 M SR
Project Status:	Ongoing.
Scope of Work:	Turkey Solution to Implement an Integrated ISS System at RAS Tanura IWWTP Project • Approval from the authorities. • Supply installation and construction of - CAT-4 fence. - Lighting design and calculations for perimeter, Gatehouse, buildings etc. - Main Gate House and support building. - Motorized Sliding gates. - Physical security like Road Blocker, Raising Arm Barrier, speed humps. - Fixed and PTZ cameras, Video and Data Transmission system - Access control system for vital buildings and entry guard house, • Operator training, power up and testing commissioning and warranty. • Maintenance of the installed system as well other security equipment for the old existing equipment • Related civil work like foundations, trenching, road crossings etc.

Client Name:	QUDRA One
Main Contractor:	Tiejun
Project Name:	QASSIM 1 1800 MW CCGT PROJECT
Project Duration:	Jan 2025 – Jun 2026
Project Value:	13.5 M SR
Project Status:	Ongoing.
Scope of Work:	Turkey Solution to Implement an Integrated ISS System at QASSIM 1 Project • Approval from the authorities. • Supply installation and construction of - Security Control Center. - Welded mesh fence. - IDAS system for perimeter fence. Including Fence sensor and microwave. - Lighting design and calculations for perimeter, Gatehouse, buildings etc. - Admin Gate House and support building. - Plant Gate House and Search Facility building. - Truck Gate House and support building. - Motorized Sliding gates. - Physical security like Road Blocker, Raising Arm Barrier, speed humps. - Fixed and PTZ cameras, Video and Data Transmission system - Access control system for vital buildings and entry guard house, - ID card printing and card development - UPS emergency generator and power distribution for all the security components - Command and control software for the control room, operator monitoring and controlling software. Video Wall, • Operator training, power up and testing commissioning and warranty. • Maintenance of the installed system as well other security equipment for the old existing equipment • Related civil work like foundations, trenching, road crossings etc.

Client Name:	SIPCHEM
Main Contractor:	ITS
Project Name:	SIPCHEM Fence Renovation & Upgradation.
Project Duration:	Jan 2024 – DEC 2025
Project Value:	26.0 M SR
Project Status:	Ongoing.
Scope of Work:	Turkey Solution to Implement an Integrated ISS System at SIPCHEM Project • Approval from the authorities. • Supply installation and construction of - Command and control center. - Welded mesh fence. - IDAS system for perimeter fence. Including Fence sensor and microwave. - Perimeter Lighting. - Lighting design and calculations for perimeter, Gatehouse, buildings etc. - Main Gate House and support building. - Motorized Sliding gates. - Physical security like Road Blocker, Raising Arm Barrier, speed humps. - Perimeter fence. - Fixed and PTZ cameras, - Video and Data Transmission system - Access control system for vital buildings and entry guard house, - ID card printing and card development - UPS emergency generator and power distribution for all the security components - Command and control software for the control room, operator monitoring and controlling software. Video Wall, • Operator training, power up and testing commissioning and warranty. • Maintenance of the installed system as well other security equipment for the old existing equipment • Related civil work like foundations, trenching, road crossings etc.

Recently Executed Projects!

Client Name: MARAFIQ RED SEA

Main Contractor: TIEJUN

Project Name: **ISS System For Red Sea Project**

Project Duration: **Jun 2022 – Jun 2024**

Project Value: 40.0 M SR

Project Status: Ongoing.

Scope of Work: Turkey Solution to Implement an Integrated ISS System at Red Sea Project

- Approval from the authorities.
- Supply installation and construction of
 - Regional Command and control center to monitor all 17 sites including sites on Island.
 - Perimeter Lighting for Large solar plant sites.
 - Perimeter lighting distribution through Medium Voltage power transmission.
 - Lighting design and calculations for perimeter, Gatehouse, buildings etc.
 - Main Gate House and support building.
 - Motorized Sliding gates.
 - Physical security like Road Blocker, Raising Arm Barrier, speed humps.
 - Perimeter fence.
 - Fixed and PTZ cameras,
 - Video and Data Transmission system
 - Access control system for vital buildings and entry guard house,
 - ID card printing and card development
 - UPS emergency generator and power distribution for all the security components
 - Command and control software for the control room, operator monitoring and controlling software. Video Wall,
- Operator training, power up and testing commissioning and warranty.
- Maintenance of the installed system as well other security equipment for the old existing equipment
- Related civil work like foundations, trenching, road crossings etc.

Client Name:	Saudi Electric
Main Contractor:	SEPCOIII
Project Name:	ISS System for 380/33kV SWPC BSP Jubail
Project Duration:	MAR 2022 – Jun 2023
Project Value:	5.0 M SR
Project Status:	Ongoing.
Scope of Work:	Turkey Solution to Implement an Integrated ISS System at 3B 380/33kV SWPC 3B BSP project • Approval from the authorities. • Supply installation and construction of - Integration of Substation with RSCC (Regional Security control Center) - Main Gate House and support building. - Perimeter lighting Design and installation. - Motorized Sliding gates. - Physical security like Road Blocker, Raising Arm Barrier, speed humps. - Perimeter fence. - Fixed and PTZ cameras, - Video and Data Transmission system - Access control system for vital buildings and entry guard house, - ID card printing and card development - UPS emergency generator and power distribution for all the security components - Command and control software for the control room, operator monitoring and controlling software. Video Wall, • Operator training, power up and testing commissioning and warranty. • Maintenance of the installed system as well other security equipment for the old existing equipment • Related civil work like foundations, trenching, road crossings etc.

Client Name: Saline Water Conversion Corporation – SWCC Jubail

Main Contractor: ITS

Project Name: **IDAS System for SWCC JUBAIL 2**

Project Duration: **Sep 2021 – Jul 2022**

Project Value: 6.0 M SR

Project Status: Ongoing.

Scope of Work: Overall Turnkey (EPC) Integrated Security system for Integrated Security System

- Design of stage 3 drawings and documents
- Approval from the authorities.
- Supply installation and construction of
 - Main Gate House and support building.
 - Motorized Sliding gates.
 - Perimeter Lighting design supply and installation.
 - Physical security like Road Blocker, Raising Arm Barrier, speed humps.
 - Perimeter fence.
 - Fixed and PTZ cameras,
 - Video and Data Transmission system
 - Access control system for vital buildings and entry guard house,
 - ID card printing and card development
 - UPS emergency generator and power distribution for all the security components
 - Command and control software for the control room, operator monitoring and controlling software. Video Wall,
- Operator training, power up and testing commissioning and warranty.
- Maintenance of the installed system as well other security equipment for the old existing equipment
- Related civil work like foundations, trenching, road crossings etc.

Client Name:	SABIC (Saudi Basic Industries Corporation)
Main Contractor:	ITS
Project Name:	IDAS System for SABIC Head Quarter
Project Duration:	Jun 2021 – Jan 2022
Project Value:	2.0 M SR
Project Status:	Ongoing.
Scope of Work:	Turkey Solution to Implement an Integrated IDAS System at SABIC – HQ in compliance & conformity with latest security directives set by the HCIS-SEC. • Approval from the authorities. • To install the volumetric intrusion detection system across the perimeter, wall of HQ. • Protect the gate # 5 with intrusion detection system with help of short-range Microwave detectors. • Data communication from field to the control room in the HQ. • Integration of the existing CCTV system cameras with the newly installed system to assess the alarm threshold with the help of the cameras. • It includes the design engineering, construction installation testing, commissioning, training warranty and after sale support for the installed system.

Client Name:	MAADEN
Main Contractor:	DOOSAN
Project Name:	Sliding Gate for Class-1 Fence
Project Duration:	Jan 2021 – August 2021
Project Value:	Less than 0.5 M SR
Project Status:	Completed, Handed-over.
Scope of Work:	The Gate design based upon the HCIS methodology as required in SEC – 02. • Sliding Gates Design Supply and installation.

Client Name:	Saline Water Conversion Corporation - SWCC
Main Contractor:	SEPCOIII Electric Power Construction Corporation Branch
Project Name:	Yanbu Power and Desalination Plant Phase – 3.
Project Duration:	Nov 2018 – Jun 2020
Project Value:	41.0 M SR
Scope of Work:	Overall Turnkey (EPC) Integrated Security system for the power and Desalination plant YANBU Phase - 3 includes: • Design of stage 3 drawings and documents • Approval from the authorities (HCIS) • Perimeter lighting design supply and installation. • Supply installation and construction of Perimeter fence sensor detection system. Perimeter volumetric Microwave detection system • Fixed and PTZ cameras Video and Data Transmission system Access control system for vital buildings and entry guard house. • Manual and motorized sliding gate for Class-1 fence. • Implementation of RADAR for the Marine area surveillance system • Long range and short range Thermal cameras for the water intake, Ditches and fence penetration points. • Design and Implementation of the perimeter fence lighting system for the overall plant. • Gates and guard houses and bollards for the plant access points. ID card printing and card development • UPS emergency generator and power distribution for all the security components • Command and control software for the control room, operator monitoring and controlling software Video wall, Operator training, power up and testing commissioning and warranty • Maintenance of the installed system as well other security equipment for the old existing equipment, Related civil work like foundations, trenching, road crossings etc.

Client Name: SAUDI ARAMCO

Main Contractor: HYUNDAI Engineering & Construction Co., Ltd.

Project Name: **Saudi Aramco Uthmaniaya Gas Plant**

Project Duration: **Nov 2018 – Dec 2020**

Project Value: Less than 1.0 M SR

Project Status: Completed, Handed-over.

Scope of Work: The Fence design based upon the HCIS methodology as required in SEC – 02.

- Fence Modification.
- Swing Gate installation.

Client Name:	Saline Water Conversion Corporation - SWCC
Main Contractor:	SEPCOIII Electric Power Construction Corporation Branch
Project Name:	Integrated Security System for Ras Al Khair Power and Desalination Plant SWCC
Project Duration:	Jan 2018 Jun 2019
Project Value:	12.2 M SR
Project Status:	Completed, Handed-over, Under Warranty
Scope of Work:	Overall Turnkey (EPC) Integrated Security system for the power and Desalination plant Ras Al Khair Includes: • Design of stage 3 drawings and documents • Approval from the authorities. • Supply installation and construction of - Perimeter fence sensor detection system. - Perimeter Volumetric Microwave detection system, - Fixed and PTZ cameras, - Video and Data Transmission system - Access control system for vital buildings and entry guard house, - ID card printing and card development - UPS emergency generator and power distribution for all the security components - Command and control software for the control room, operator monitoring and controlling software. Video Wall, • Operator training, power up and testing commissioning and warranty. • Maintenance of the installed system as well other security equipment for the old existing equipment • Related civil work like foundations, trenching, road crossings etc.

Client Name: Saline Water Conversion Company - SWCC

Main Contractor: SEPCOIII Electric Power Construction Corporation Branch

Project Name: **Yanbu Power and Desalination Plant, Package (T) Tanker Terminal Package**

Project Duration: **Sep 2017 – Sep 2018**

Project Value: 4.2 M SR

Project Status: Completed, Handed-over, Under Warranty

Scope of Work:

- Design of HCIS Stage 3 Includes drawings and documents.
- Design review & approval from client and HCIS
- Construction of Cat I guard house and search facility building
- Supply construction and installation of
 - X-rays Machine, - Metal Detector,
 - Explosive detector, Hand-held Metal Detector.
 - K - 12 road blockers,
 - Rising Arm Barriers,
 - Sliding Gates,
 - Turnstiles.
- K - 12 fixed Bollard.
- Bullet proof Glass and Doors.
- Explosive proof PTZ Cameras
- Access Control System,
- Ship monitoring with VMD
- Fixed and PTZ Cameras and their related Software for the Remote Monitoring.
- Maintenance and Operation of the Installed System

Client Name:	SABIC
Main Contractor:	SABIC
Project Name:	Weather Monitoring System Supply & Installation of Weather monitoring system on birth
Project Duration:	Oct 2017 – Jul 2018
Project Value:	1.2 M SR
Project Status:	Completed and Handed-over
Scope of Work:	The SOW included Site Survey, System Design, Installation of Weather monitoring system: Weather Sensor in field Solar system for backup UPS Server and workstation Fiber optic communication

Client Name:	SABIC
Main Contractor:	SABIC
Project Name:	Plant Monitoring Cameras for SABIC SABTANK Solid Area Supply & Installation of High Profile Explosion Proof PTZ Camera
Project Duration:	May 2016 – Dec 2017
Project Value:	1.4 M SR
Project Status:	Completed and Handed-over
Scope of Work:	The SOW included Site Survey, System Design, Installation of New Security System for the operation at UHT including: CCTV Installation at Warehouse, Urea Loading Area, Urea Carrying Conveyor Installation of Cable Tray, Data Transmission Wired & Wireless & Handover.

Client Name: SAUDI ARAMCO

Main Contractor: Sultan S. Al-Gohaidan Sons Co.

Project Name: **Saudi Aramco Royal Terminal Riyadh Air Base**

Project Duration: **March 2017 – Dec 2017**

Project Value; Less than 1.0M SR

Project Status: Completed and Handed Over

Scope of Work:

Saudi Aramco Royal Terminal security upgrade includes:

- Motorized Sliding gates
- Fixed and PTZ cameras
- Control room equipment
- Video Data Transmission Network
- Access Control System
- System Maintenance

Client Name:	SABIC
Main Contractor:	SABIC
Project Name:	Solid Berth Area Security Project SABTANK Complete System Integration
Project Duration:	Dec 2013 – Feb 2015
Project Value:	9.9 M SR
Project Status:	Completed and Handed Over
Scope of Work:	Site Survey, System Design, Security Fence (HCIS – CAT III), Perimeter Security Lights, Security Guard House with complete Security equipment, Road Blockers, Rising Arm Barriers, Turnstiles. Install and Fabrication of Steel Structure, Space Frames, Integration and Data transmission via Cable & Wireless, Testing and Commissioning and Handover.

ITS preferred by Experts Because!

- ITS solutions extend comfort to clients to perform their other valuable work whereas; ITS absorbs all responsibilities related to “Turn-Key” solutions
- ITS offers most economical and competitive solutions without compromising Work-Quality (Quantitative & Qualitative) extends best ROI
- ITS Experts utilizes industry leading innovative products and ideas in the process of building-up solutions
- ITS is approved for HCIS work and enjoy reputation of on-time completion projects
- It is worth to state that since, ITS is well aware about kingdom’s environmental issues (Industrial security, hazard & health) hence; embrace dominative expertise and capabilities to deploy any kind of outdoor active components
- ITS; being the subsidiary of Ms. Shibh Al Jazira Contracting Company; is blessed to enjoy logistic and financial support if and when required to execute critical projects.
- At present there are 40+ onboard human resources holding various expertise capable to execute numerous size of projects. However; for extra requirements human resources could easily mobilized from Mother Company
- Above all, ITS’s extreme dedicated and experienced professionals always exhibited and shared their expertise while showing progressive increase in learning curve while working with:

"Passion to secure you"

ITS Company Values!

We **Strength** our valued customer **Competency** by keeping them updated in knowledge & world leading trends

- We **Encourage Innovation** and **Admire Innovative Minds** that keeps **ITS Aligned** with **knowledge** based **Competitive Future**
- We **Empower** our **Teams** by furnishing professional training programs to achieve world-class performance standards
- We **Motivate** and involve **Our Engineers in** Designing, Planning & Development and Implementation & Execution of **Project Life Cycle**
- We strongly feel that **our Staff** is our **Most Precious Asset** hence; we consider it our **Social & Ethical** responsibility to establish and maintain **Safe & Healthy Working Environment** in-house and at site 24/7/365.

ITS Competencies!

We offer System Integration (SI) that converses all physical and virtual sub-systems (computers, processing controllers, data stored in databases, software and applications into One-Systems.

Our trained and seasoned professional execution team members perform entire process in seamless manners without disturbing existing system.

ITS security and communication Division offers integrated turnkey solutions in the following fields:

- ❖ Overall Integrated security system
- ❖ Voice over IP (VoIP)
- ❖ Video Motion Detection (VMD)
- ❖ Video content analysis (VCA)
- ❖ Intrusion Detection Alarm Management and Assessment System, including detection sensors like, microwaves, fiber optic fence sensors exposed and imbedded

"Passion to secure you"

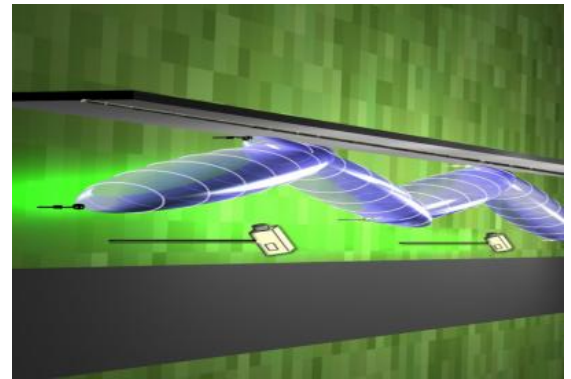

ITS Competencies cont'd!

Our Integrated Solutions (IS) incorporates infrastructure design, civil works, installation, testing, and commissioning and the most important factor is the selection of hardware and software products.

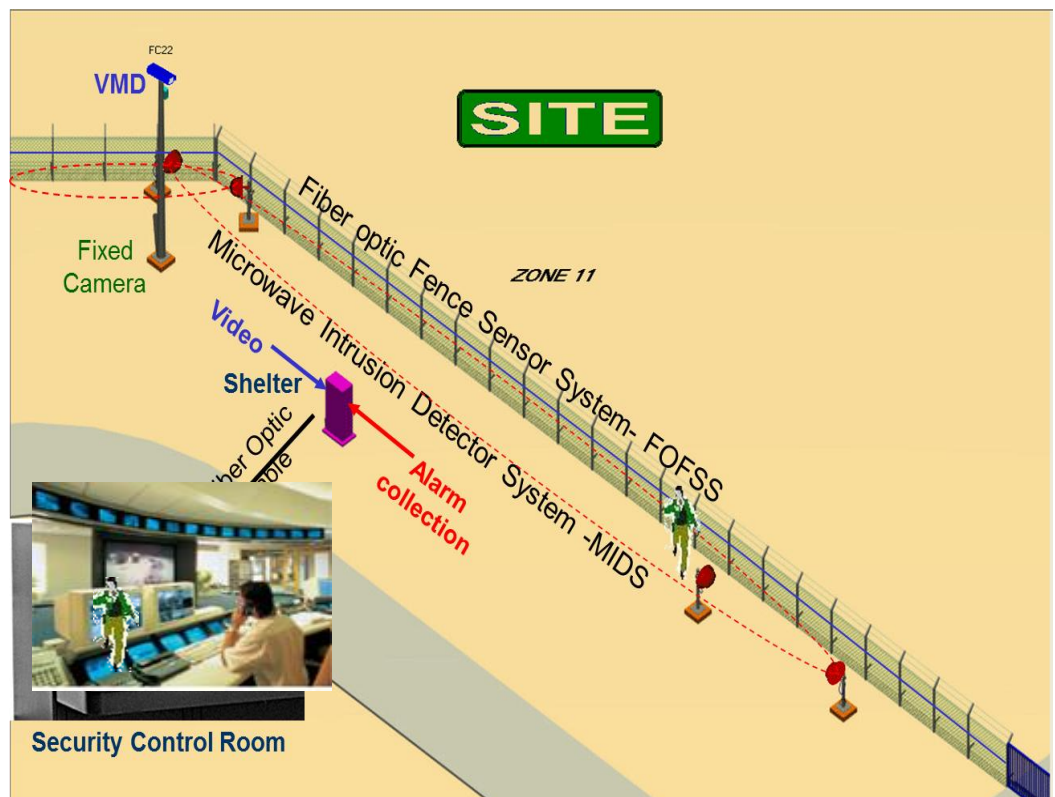

During the planning process, our professional technical experts make selection of most suitable, reliable sensors meeting the current technologies, the physical surroundings (geographic, weather and above all the purpose of the actual necessity of the Security System).

Most of our offered and supplied sensors such as Microwave Volumetric Detectors are from South West USA and CIAS from Italy

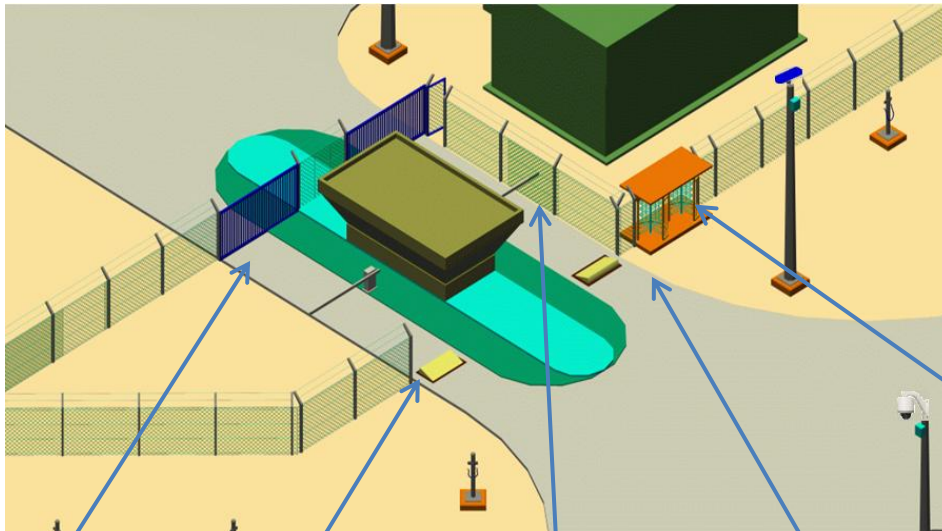

We offer range of different sensors in complete design and just to give you the first-hand feeling, few of these sensors are given below

Typical Industrial site, perimeter protection, field equipment installation details.

ITS Competencies cont'd!

Typical layout of an Access Control System and Pedestrian System.

On-site supplied and installed Access control peripherals such as RFID Readers, Bio-metric, Rising Arm Barriers, Road Blockers, under vehicle inspection, Turnstiles and ANPR system Anti Vehicles Barriers, Bollards etc. include integration with Alarm Management Core System.

Wired and Wireless Communication

TETRA is an abbreviation of Terrestrial Trunked Radio digital standard for professional Mobile Radio (PMR) TETRA is a global standard for radio communication in the same way that GSM is the mobile telephony standard.

TETRA was developed to meet the needs of the most demanding professional radio users who need fast one-to-one and one-to-many radio communication using voice and data in their daily work. Users are typically public safety and security organizations like police, fire and rescue forces, ambulance services, frontier guards and other professional cellular users like petrochemical industries, generation and airports, and so on

TETRA uses Time Division Multiple Access (TDMA) with four user channels on one radio carrier and 25 kHz spacing between carriers. Both point-to-point and point-to-multipoint transfer can be used. Digital data transmission is also included in the standard though at a low data rate.

ITS Competencies cont'd!

(TMO) using switching and management infrastructure (SwMI) made of TETRA base stations (TBS). As well as allowing direct communications in situations where network coverage is not available, DMO also includes the possibility of using a sequence of one or more TETRA terminals as relays. This functionality is called DMO gateway (from DMO to TMO) or DMO repeater (from DMO to DMO). In emergencies, this feature allows direct communications underground or in areas of bad coverage.

In addition to voice and dispatch services, the TETRA system supports several types of data communication. Status messages and short data services (SDS) are provided over the system's main control channel, while packet-switched data or circuit-switched data communication uses specifically assigned traffic channels.

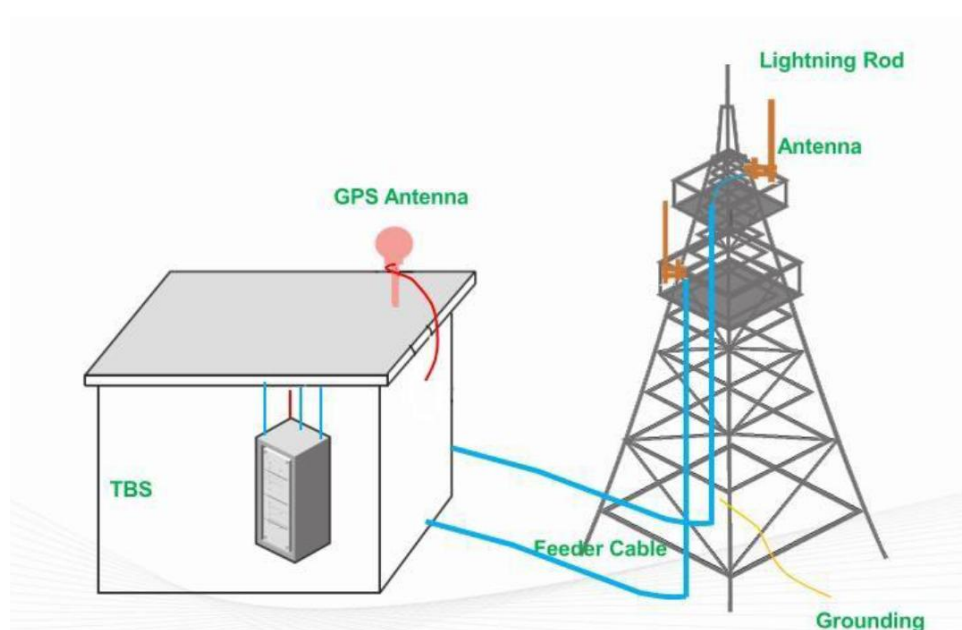

TETRA provides for authentication of terminals towards infrastructure and vice versa. For protection against eavesdropping; air interface encryption and end-to-end encryption is available.

The common mode of operation is in a group calling mode in which a single button push will connect the user to the users in a selected call group and/or a dispatcher. It is also possible for the terminal to act as a one-to-one walkie-talkie but without the normal range limitation since the call still uses the network. TETRA terminals can act as mobile phones (cell phones), with a full-duplex direct connection to other TETRA Users or the PSTN. Emergency buttons, provided on the terminals, enable the users to transmit emergency signals, to the dispatcher, overriding any other activity taking place at the same time

ITS with their partners can provide full TETRA wireless or wired communication solutions based upon the client requirements. We provide detail signal coverage calculations for plants and client premises based upon the Saudi Arabia existing infrastructure.

ITS is deploying at their SWCC facility

We use normally two omni directional antennas for TXRs.
One antenna used for the transmission and another is used for the RX.
